+234 810 705 0824

PROFESSIONAL SUMMARY

I’m a technical lead and full-stack software developer focused on scalable mobile-first products, dependable systems, and high-quality delivery. I work across architecture, React Native, React, Node.js, real-time systems, and third-party integrations, while helping cross-functional teams turn product goals into secure, maintainable software.

CORE COMPETENCIES

- Technical Leadership & Team Management
- Solution Architecture & System Design
- Mobile App Development (React Native & Expo)
- Node.js (Express & NestJS)
- React
- API Integration & Third-Party Services
- Software Design & Code Review
- Project Planning & Agile Execution
- Real-time Systems (WebSockets)
- CI/CD & Version Control (GitHub, SVN)
- Performance Optimization & Profiling
- Stakeholder Communication & Documentation

PROFESSIONAL EXPERIENCE

Full-Stack Software Developer / Technical Lead

CephasHR - Cephas ICT Hub — 2026

- Implemented organization onboarding with organization, staff, and super-admin dashboards for clear role-based workflows.
- Built HR workflows for recruitment, employee records, attendance, payroll, performance, and document management.
- Integrated organization plan subscriptions and payment flows to support scalable access across customer organizations.
- Developed productivity-to-points earning and points-to-airtime and data conversion features as part of the rewards experience.
- Delivered the platform with React.js, TypeScript, Node.js, and PostgreSQL using reusable, maintainable production workflows.....

Full-Stack Software Developer

CEDU - Cephas Educational Games — 2026

- Built learner and administration experiences with React and TypeScript, supported by dedicated user and admin dashboards.
- Integrated payments and points-to-airtime conversion to support the platform’s rewards experience.
- Implemented parental account controls for safer, more flexible household management.
- Created a reusable asset and resources bank to support efficient content delivery and future product expansion.
- Delivered the platform with React.js, TypeScript, Node.js, and PostgreSQL across frontend, backend, and data workflows.

Project Team Lead / Technical Coordinator

Providus Bank - Contract — July 2025 - November 2025

- Managed and coordinated all project activities, built timelines, defined scope, and ensured alignment with business objectives.
- Led cross-functional meetings and coordinated backend, frontend, QA, and product stakeholders for seamless information flow.
- Aligned backend and frontend teams, resolved integration conflicts, and maintained architectural consistency.
- Monitored risks, tracked milestones, and ensured timely delivery of secure, compliant, high-quality features.

Technical Lead

Rubies Tech — May 2025 - October 2025

- Led technical direction and coordinated development teams to ensure successful delivery of engineering tasks and product implementations.
- Coordinated review meetings between stakeholders and technical teams to align expectations, clarify requirements, and track progress.
- Facilitated risk identification, resource planning, and process improvements to enhance project delivery efficiency.
