IDOWU AKINDELE FELIX

Technical Lead & Solutions Architect
akindelefelix1@gmail.com
+2348107050824

PROFESSIONAL SUMMARY

Results-driven Technical Lead & Solutions Architect experienced in leading cross-functional engineering teams, managing full project lifecycles, and architecting scalable mobile and software solutions. Skilled in React Native, JavaScript, real-time systems, API integrations, and mobile solution design. Adept at coordinating teams, aligning backend and frontend workflows, conducting technical reviews, and ensuring on-time, high-quality delivery. Passionate about building secure, efficient products and mentoring teams for long-term technical excellence.

CORE COMPETENCIES

- Technical Leadership & Team Management
- Solution Architecture & System Design
- Mobile App Development (React Native & Expo)
- Node Js (express & Nest js)
- React
- API Integration & Third-Party Services
- Software Design & Code Review
- Project Planning & Agile Execution
- Real-time Systems (WebSockets)
- CI/CD & Version Control (GitHub, SVN)
- Performance Optimization & Profiling
- Stakeholder Communication & Documentation

PROFESSIONAL EXPERIENCE

ProjectTeamLead / TechnicalCoordinator

Providus Bank — July 2025 – Nov 2025 [Contract]

- **Project Coordination & Planning:** Managed and coordinated all project activities, built timelines, defined scope, and ensured alignment with business objectives.
- **Team Leadership & Communication:** Led cross-functional meetings, coordinated backend, frontend, QA, and product stakeholders, and ensured seamless information flow.
- **Technical Alignment:** Worked closely with backend and frontend teams to synchronize development efforts, resolve integration conflicts, and maintain architectural consistency.
- **Delivery Oversight:** Monitored risks, tracked milestones, and ensured timely delivery of secure, compliant, and high-quality features.

Technical Lead

Rubies Tech — (May 2025 – Oct. 2025)

- Led technical direction and coordinated development teams to ensure successful delivery of engineering tasks and product implementations.
- Coordinated review meetings between stakeholders and technical teams to align expectations, clarify requirements, and track progress.
- Facilitated risk identification, resource planning, and process improvements to enhance project delivery efficiency.

Software Engineer & Technical Lead

Cephas ICT Hub — Aug 2020 – Till date

- Led engineering teams in building and integrating multiple systems using APIs and reusable components.
- Designed and implemented scalable mobile and software solutions using JavaScript and React Native.
- Architected and integrated third-party APIs to enhance functionality and user experience.
- Conducted unit, integration, and system testing for reliable product delivery.
- Collaborated with cross-functional teams to align execution with product vision and business goals. - Delivered clean, maintainable, long-term scalable code.

Mobile Engineer / Technical Lead

OGFIMS (Ogun State Government Project)

- Developed and optimized mobile application components for government service operations.
- Implemented push notifications, payment gateway integrations, and multilingual translation features.
- Built vendor–user interaction flows that improved service communication and system usability.
- Delivered clean architecture and ensured seamless backend–frontend alignment.

Technical Lead

Duvic Drop (UK Client)

- Provided technical leadership and oversight throughout the project lifecycle.
- Coordinated engineering tasks and guided the mobile development team toward a successful product launch.
- Provided technical leadership, coordinated engineering tasks, and guided mobile development to successful launch.

Mobile Engineer

Artisan Connect — July 2023 – Jan 2025

- Designed architecture and integration for all major mobile app components.
- Implemented Paystack payments and real-time WebSocket chat.
- Optimized app performance using profiling and memory analysis.
- Managed App Store and Play Store releases end-to-end.

Software Engineer

HonourWorld App — Feb 2023 – Nov 2023

- Built mobile features for airtime, data, electricity tokens, and cable subscriptions.
- Integrated Paystack, Monnify, and Flutterwave for flexible payments.
- Improved real-time functionality for smooth user transactions.

Software Engineer
Get-2-Know — Oct 2024 – Jan 2025

- Built advanced quiz features with progress tracking, scoring, and instant feedback.
- Implemented real-time competitive quiz modes for individuals and groups.
- Participated in product collaboration, feature design, and maintenance.

ADDITIONAL PROJECT LEADERSHIP *(Coordinated/led technically)*

- **Flat Padi**
- **Celma**
- **sound Map**
- **Rams**

TECHNICAL SKILLS

• **Languages:** JavaScript, React Native
• **Tools:** Asana, Jira, GitHub, SVN, WebSockets, Adobe Photoshop
• **Practices:** OOP, Software Architecture, Code Reviews, CI/CD •
Other: Leadership, Project Management, Prompt Engineering

EDUCATION

B.Tech, Biochemistry Ladoke Akintola University of Technology
— Jan 2017 – Aug 2023

CERTIFICATIONS

- Certified Project Manager
- Leadership & Management
- Google AI Essentials
- Prompt Engineering
- Foundations of Project Management
- Interpersonal Skills
- Basic of Finance
